

Veterinary Certificate

Date: **September 17th, 2018**

Consignor: **VanMeter-Gentry**

Horse's Name: **Out of my Dreams '17**

Hip #: **1533**

Sale: **Keeneland September Yearling Sale**

To Whom It May Concern;

The repository radiographs of the above named horse were reviewed on September 15th, 2018. Within the left front fetlock, slight lucency of the sagittal ridge of the third metacarpal bone and mild medial sesamoiditis were noted. Within the right front fetlock, slight lucency of the sagittal ridge of the third metacarpal bone was noted. Mild sharpness of the proximal aspect of the intermediate carpal bone was noted in the left carpus. Mild remodeling of the abaxial (non-articular) surface of the right hind medial sesamoid was also found. No further radiographic abnormalities were discovered. **With reference to the above findings, I would consider the prognosis for achieving and maintaining racing soundness to be excellent.** If you have any questions please feel free to contact me at (859)987-4303.
